Run this 5-minute sweep before you submit anything

THE AI TELLS, find and fix these before you submit

CHECK FOR		HOW TO FIX IT
☐	Em dashes (—)	AI loves these. Replace with a comma or rewrite the sentence.
☐	"Delve"	Nobody says this. Delete it. Replace with "explore" or "look at."
☐	"Leverage"	Replace with "use" every single time.
☐	"Utilize"	Replace with "use." Always.
☐	"Spearheaded"	Replace with "led" or "started."
☐	"Orchestrated"	Replace with "managed" or "coordinated."
☐	"Pioneered"	Replace with "created" or "built."
☐	Same-length bullets	If all bullets start with a verb and have the same rhythm, vary at least 3.
☐	Zero contractions	Add "I'm" instead of "I am." Add "didn't" instead of "did not."
☐	Vague numbers	"increased sales" becomes "increased sales 18% over 4 months." Add YOUR real number.
☐	Generic summary	"Results-driven professional" must go. Write 2 sentences in plain language about what you actually do.
☐	Missing personal reason	Cover letter: did you fill in WHY YOU WANT THIS SPECIFIC JOB? AI can't write that. You have to.
☐	Unverified info	Every number, certification, and achievement must be something you can prove and discuss.

THE INTERVIEW TEST, THE ONLY TEST THAT MATTERS

Read your application out loud, start to finish, as if you are sitting across from a hiring manager. If any sentence makes you stumble, second-guess yourself, or reach for an explanation, that sentence needs to be rewritten. You are not done until you can own every word.
