

GET HIRED

Your take-home guide to resumes, LinkedIn, safety, and AI
Washington County Library System

SCAN FOR EVERYTHING

symbeyond.ai/gethired

Resume Builder, demo prompts, the De-AI checklist, and the safety guide, all in one place on your phone.

SAFETY FIRST, KNOW THE WARNING SIGNS

SIX SIGNS A JOB POSTING IS A SCAM

- They ask you to pay for training, a background check, or equipment. Real jobs never charge you.
- You're hired with no interview. Real employers talk to you first.
- They send a check and ask for money back. The check will bounce.
- Strange links, or recruiter emails from a personal Gmail or Yahoo account.
- The pay sounds too good for the work described.
- Pressure to decide right now, or to give your Social Security number early.

THE RULE

If something feels off, it probably is. Search the company name plus "scam" before doing anything. A real job will still be there tomorrow.

YOUR RESUME, START HERE

BUILD IT WITH RESUME BUILDER

symbeyond.ai/resume

Free, no account needed, works right on your phone. Answer five simple questions and get a real resume you can edit, print, or copy into any application.

WHAT GOES ON A RESUME

- Contact info: name, phone, email, LinkedIn URL
- Professional Summary: 2-3 sentences about who you are and what you bring
- Work Experience: each job with title, company, dates, and 3-5 bullet points
- Skills: keywords pulled directly from the job posting
- Education: degree, school, year
- One page unless you have 10+ years of directly relevant experience

NO INTERNET HANDY? USE THIS PROMPT INSTEAD

Paste this into Claude, ChatGPT, Meta AI, or Grok:

"I'm applying for a [job title] at [type of company]. Here is my work history: [paste your experience]. Here is the job description: [paste it]. Write me a clean, ATS-friendly resume. Simple formatting, no tables or columns."

YOUR PHONE CAN TYPE FOR YOU

Don't want to type on a small keyboard? Tap any text box, then tap the microphone icon on your phone's keyboard, and just talk. It types what you say. Works in Resume Builder, Claude, ChatGPT, anywhere you can type.

YOUR LINKEDIN, THE 4 THAT MATTER

BUILD THESE FOUR THINGS

1. HEADLINE. Use all 220 characters. Include your job type, a skill, and a result.
2. ABOUT SECTION. Write in first person. 3-4 sentences. Sound like yourself.
3. SKILLS. Add skills that match the jobs you want.
4. OPEN TO WORK. Turn it on (set to "Recruiters only" if you're still employed).

HOW TO USE AI FOR LINKEDIN

Paste this into Claude, ChatGPT, Meta AI, or Grok:

"I work as a [your role] with [X] years of experience. I am good at [top 3 strengths]. I want work in [field]. Write me a LinkedIn headline (under 220 characters) and a 3-sentence About section. No em dashes. No corporate jargon."

COVER LETTERS, THE RULE

USE AI FOR THE BODY. WRITE THE BEGINNING AND END YOURSELF.

Paste this into Claude, ChatGPT, Meta AI, or Grok:

"Write a cover letter for a [job title] position. Job description: [paste it]. My experience: [paste resume]. Under 250 words. Leave a blank labeled [WHY THIS COMPANY] where I will write my personal reason."

- ALWAYS fill in that blank. It is the part only you can write.
- ALWAYS verify every number AI includes. AI can get facts wrong.

FREE TOOLS TO USE TODAY

Resume Builder	sybeyond.ai/resume, built for this community, free
Claude / ChatGPT	claude.ai or chatgpt.com, free, great for writing and editing
Meta AI / Grok	meta.ai or available on X, also free, work the same way
LinkedIn	linkedin.com, free account, takes about 20 minutes
Jobscan	jobscan.co, paste resume + job posting, see your ATS match score
Grammarly	grammarly.com, free grammar checker, catches AI-sounding phrases

THE INTERVIEW TEST

Before you submit anything: Can you talk about every word on your application in an interview? If yes, submit it. If no, fix it first.
