

DEMO PROMPTS

Copy-ready prompts and tools from today's class

DEMO 1: Build Your Resume

Open on your phone:

symbeyond.ai/resume

Tip: Free, no account needed. Five quick questions, then a real resume you can edit, print, or copy. Built for this community.

DEMO 1B: No Internet? Use This Prompt Instead

Copy and paste into Claude, ChatGPT, Meta AI, or Grok:

I'm applying for a [JOB TITLE] at [TYPE OF COMPANY]. Here is my work history: [PASTE YOUR EXPERIENCE HERE] Here is the job description: [PASTE JOB DESCRIPTION HERE] Write me a clean, ATS-friendly resume. Simple formatting, no tables or columns.

Tip: Works the same in any AI. Replace the brackets with your real info.

DEMO 2: Humanize the Draft

Copy and paste into Claude, ChatGPT, Meta AI, or Grok:

Here is a paragraph from a resume AI just wrote for me: [PASTE THE PARAGRAPH HERE] Rewrite it so it sounds like a real person. Remove em dashes. Replace 'leverage' and 'utilize' with plain words. Vary the sentence structure. Add a blank where I can insert my own specific result.

Tip: Watch the difference between the before and after. That gap is the skill.

DEMO 3: Write Your LinkedIn Headline and About

Copy and paste into Claude, ChatGPT, Meta AI, or Grok:

I work as a [YOUR ROLE] with [X] years of experience. I am good at [TOP 3 STRENGTHS]. I want work in [FIELD OR INDUSTRY]. Write me: 1. A LinkedIn headline under 220 characters 2. A 3-sentence About section Both should sound like a real person. No em dashes. No corporate jargon.

Tip: Paste this directly into LinkedIn today. No editing required.

DEMO 4: Write a Cover Letter with a Personal Gap

Copy and paste into Claude, ChatGPT, Meta AI, or Grok:

Write a cover letter for a [JOB TITLE] position. Job description: [PASTE JOB DESCRIPTION] My experience: [PASTE RESUME] Keep it under 250 words. Skip the generic opener. Leave a blank labeled [WHY THIS COMPANY] where I will fill in my personal reason for wanting this specific job.

Tip: That blank is non-negotiable. AI cannot write it. Only they can.

REMEMBER

- Any AI works: Claude, ChatGPT, Meta AI, or Grok. Use what you have.
- Your phone's keyboard has a microphone. Tap it and talk instead of typing.
- Always run the De-AI Checklist before submitting anything.
- The interview test: can you defend every word in person? If yes, submit it.
